EXECUTIVE SUMMARY

As a Product Designer, I leverage over a decade of design experience creating technology-driven solutions that solve complex problems and add value for my customers. I specialize in developing innovative products that leverage systems, design patterns, AI, and machine learning.

Currently, as the Lead Senior Product Designer for **The Switch Is On**, I work with the Building Decarbonization Coalition (BDC) to eliminate natural gas from residential and commercial homes, aiming to reduce 35% of total US greenhouse gas emissions. My role involves creating simple and intuitive ways for customers to connect with decarbonization solutions: think of us as the middle-men.

Driven by a need to make an impact, I aspire to create work that simplifies and enhances people's lives. My curiosity spans the commercial space, sustainable real estate, and healthcare sectors. I aim to lead teams that develop both digital and analog solutions, merging technology with human-centered design to address real-world problems.

CORE COMPETENCIES

Product Strategy | Brand Positioning | AI Design | Design Systems | Service Design | User Research | Design Leadership | AI Creative Direction & Development

EXPERIENCE

Building Decarbonization Coalition (BDC) – USA Lead Digital Product Designer

Industry: Climate Technology

Own all digital product design for The Switch Is On: website, the Contractor Finder, the Contractor Hub.

Led design and implementation of Contractor Finder, the organization's first in-house digital product.

Created design system and component library for the Switch Is On rebrand.

Traffic increased 4–10× across all digital tools.

The Contractor Hub helped secure a $4.2M contract with Denver Regional Council of Governments.

SiriusLabs – USA & Nigeria Co-Founder & Chief Executive Officer

Industry: Software & Digital Products

Co-founded a digital product studio specializing in tech solutions for companies and their brands.

Managed all projects from concept to launch, including stakeholder meetings, design scoping, and product management.

Secured a **100% success rate** on 8 of 8 projects.

Sorcero – Washington DC, USA Senior UX & Visual Designer

Industry: Life Sciences & Medical Affairs

Led design for a live SaaS platform powered by AI and machine learning.

Reframed Medical Affairs complex workflows around a Spotify-inspired mental model, reducing cognitive load.

Built Sorcero Digital Design System from initial development through launch.

Created and launched internal design process, guidelines, and style guide.

Platform achieved 1000% productivity increase and 90% reduction in monitoring time.

Now used by 40% of Top 10 global life science enterprises.

Gravy (VECKTA) – Toronto, Canada Lead Product Design Consultant

Industry: Energy

Designed foundational UX for VECKTA Marketplace, a two-sided platform connecting energy buyers with vetted suppliers for distributed energy projects.

Created buyer experience: project configuration, RFP publishing, and "Rapid Ranker" comparison tool. Platform now delivers bids in 4 weeks vs months, with 30–50% cost savings.

Designed seller experience: opportunity discovery, RFQ response flows, and structured proposal submission.

Built the four-path decision framework (Financed, Engineered, Self Directed, Customized) to match customers with the right level of support based on internal expertise.

Gokada NG – Lagos, Nigeria Chief Product Officer

Industry: Ride Hailing, Logistics, & Transportation

Grew daily rides from 200 to over 2,000 by building a tactical recommendation system within rider and driver apps.

Managed all customer touchpoints in the mobile application.

Conducted in-person interviews and focus groups with over 500 customers.

Led weekly product prioritization meetings.

Coordinated across finance, business, ops, and technology to organize features and assign launch dates.

Led 20+ quality assurance testing sessions.

Citizen Inc (Now EY) – Portland, OR, USA Product Design Consultant

Industry: Health Insurance

Led full user experience for Cigna Health OneGuide application redesign.

Designed system architecture, 60+ healthcare sensing scenarios, and mobile screens.

Led 3 rounds of customer testing with 40+ patients experiencing chronic back pain.

Results: 46% of users went to high-performing providers, 22% fewer ER visits, 55% more virtual care adoption.

Nike (ETW) – Beaverton, OR, USA Lead Product Designer & Design Manager

Industry: Sports Research

Led design and managed development of 2 applications for Nike Sport Research Lab: Fourtrack (tablet) and Area42 (web analytics).

Created NSRL design system and translated it into a React component library.

Reduced development time from 14 days to 5 days.

Reduced time scientists spend collecting, managing, and visualizing athlete data from hours to minutes.

Organized weekly workshops with stakeholders to share progress, prioritize features, and gather requirements.

Led 15+ user acceptance tests with Nike research teams.

Ziba Design – Portland, OR, USA Interaction Design Consultant

Industry: Consulting for Healthcare, Logistics, Telematics

Created brand, UX, and UI for Freespira Gen 3, an FDA-cleared at-home treatment for panic and anxiety. Now used by 6,000+ patients with 80% panic-free at 12 months.

Led 60+ contextual research sessions across 8 states for PepsiCo, Daimler, FedEx.

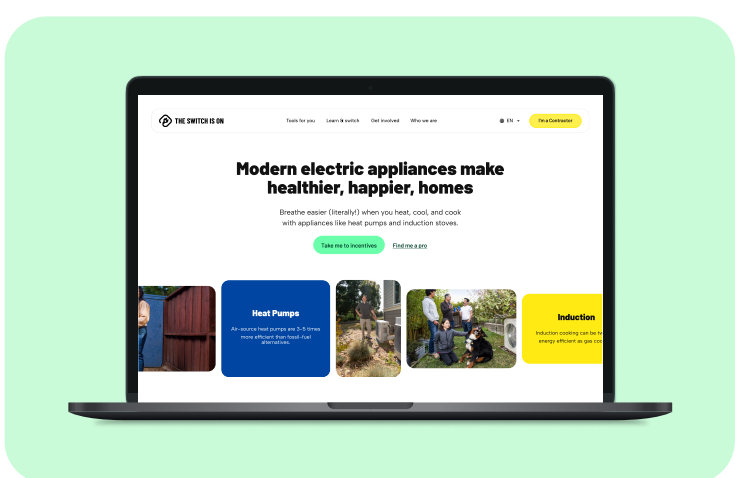

Contributed to Daimler Trucks North America Telematics Platform, providing real-time fleet health and analytics.

EDUCATION

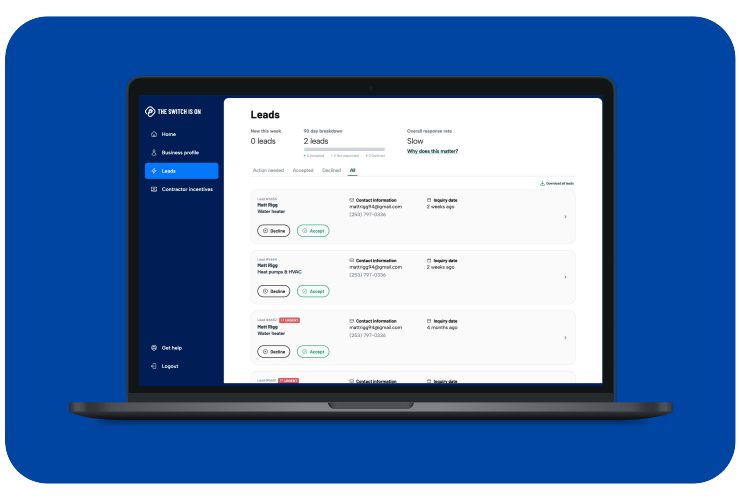

Carnegie Mellon University – Pittsburgh, PA, USA MS in Human Computer Interaction

Carnegie Mellon University – Pittsburgh, PA, USA BSc in Information Systems
